

**Great Lakes Coastal Engineering And/Or Bluff Stability
Consulting Firms
Version Current as of 6/20/2016**

"Disclaimer – This is not to be considered an endorsement of the companies on this list, nor warranty of services provided, and this list is not to be considered all inclusive of any and all companies that could offer this service. The following list of consulting firms is a **partial list** of known firms that have completed projects on Lake Michigan and/or Lake Superior. **It is only a partial list and is in no way a list of "approved" or "recommended" firms.**"

Many consulting firms have multiple office locations and the office listed can send you to their appropriate office to contact for your project needs. Potential project property owners should seek registered professional engineers, request similar project references, ask for sample-completed project information as well as talk to the local permitting agencies for comments. For further guidance on selecting competent consulting professionals, see the following University of Wisconsin Sea Grant publication "**Working with Engineers and Contractors on Shore Protection Projects**" available free from the online publications store accessible from the Wisconsin Sea Grant web page.
