Extreme Heat – 30 sec.

Extreme heat can kill. Summer heat waves kill more people in Wisconsin than any other weather-related condition. During extreme heat never leave children, disabled persons or pets in a parked car – even briefly. Keep your living space cool. Slow down and limit physical activity. Drink plenty of water and eat lightly. Wear lightweight, loose-fitting, light colored clothing and a hat. Be prepared for power outages by making sure you have a well-equipped emergency supply kit. Go to ready.wi.gov for more information.
