Tornado Drill – 30 sec.

Wisconsin averages 21 tornadoes a year. Last year there were 38, including 2 rare twisters in January that destroyed or damaged over 100 homes and buildings. On Thursday, April 23, schools will take part in a statewide tornado drill. But now is the time for you to plan and practice what you will do if a real tornado warning is issued. Does your family know what to do at home? Learn tornado warning signs. If a basement shelter isn't available, move to small interior room on the lowest floor with as many walls between you and the outside as possible. Stay away from windows. Practice. For more information, go to Ready.wi.gov.
