CITY OF COLUMBUS – EMERGENCY OPERATIONS CENTER UPDATE

Update: March 18, 2019 12:30 pm

The City of Columbus continues to manage high water levels causing flooding in the City.

While the Crawfish River water levels have gone down at Hwy 16/60, the bridge remains closed until further safety assessments are completed.

River Road is now fully open to traffic, and full access to property has returned.

Columbus Water & Light has restored power to most of the homes on Campbell Street and is working to address those that remain out.

At this point this incident moves to a recovery phase. City of Columbus residents who have items they wish to dispose of due to flood damage can bring those items this week to the Department of Public Works, 229 E. School Street, during normal business hours, 7 am-3:30 pm Monday-Friday, and on Saturday from 9 am – noon.

Residents who had damage from the flood need to fill out a Damage Assessment Form that can be found on the City of Columbus website: www.cityofcolumbuswi.com. If you have questions on the form, please contact Columbus Emergency Management at 920-623-5900.

Sandbags: for those residents who had placed sandbags out for flood control, you are advised to keep them in place for now and hold on to them for potential use later in the spring. Information on disposal of used, filled sandbags is forthcoming.
